

XCENTRIC

XCENTRIC uses additive manufacturing to create your 3D printed prototype or end use part quickly and precisely. Leverage any of our 3D printing technologies to accelerate your design cycle by validating form, fit and function prior to going into production. Advanced and automated processes along with our skilled technical team will enable you to get to market faster. We provide impactful and affordable solutions for countless industries.

3D PRINTING

1 to 50+ parts

As quick as 1-5 days

- Stereolithography (SLA)
- Fused Deposition Modeling (FDM)
- Selective Laser Sintering (SLS)
- MultiJet Printing (MJP)
- PolyJet Printing
- ColorJet Printing (CJP)
- Markforged
- Cast Urethane

WE **COMPLEMENT** AUTOMATED MANUFACTURING WITH A **SKILLED, TECHNICAL ENGINEERING TEAM** WHO WORKS WITH YOU TO **OPTIMIZE** YOUR PROJECT.

CHOOSE XCENTRIC FOR INJECTION MOLDING, CNC MACHINING AND 3D PRINTING

- Manufactured in the USA
- Two highly-advanced manufacturing facilities
- 20+ years in business
- Innovative and automated technologies with proprietary manufacturing processes
- We take your completed design from inception all the way through to parts production
- We assist you in solving simple-to-complex challenges
- All molds are built and run onsite in the USA
- We offer a Lifetime Mold Guarantee
- Thousands of engineered grade materials available and processed
- Serving 50+ industries including medical, aerospace, automotive, consumer products, music industry, marine, gaming devices, military & defense, cosmetics, agriculture, toy industry, energy, industrial, environmental and computer electronics
- ISO 9001:2015/ITAR/UL
